EDUCATION

BS in Business Administration: Management Information Systems (3.53)
Western Washington University | Bellingham, WA

EXPERIENCE

T-Mobile Events Manager
T-Mobile | Meriden, CT | Mar 2026 - Present

Directed on-site logistics and mobile promotional vehicle operations, serving as the frontline brand ambassador while presenting post-event performance analyses to senior leadership to optimize future campaigns.

- Analyzed regional customer data and foot-traffic trends to determine optimal event locations, maximizing brand exposure and marketing ROI.
- Engaged prospective and existing accounts at corporate events, utilizing consultative sales strategies to strengthen customer retention and exceed revenue targets.

Interim Manager and Loyalty Expert
T-Mobile | Jun 2025 - Mar 2026

Directed consultation sessions for 8-10 employees, empowering them to utilize data effectively and resulting in measurable improvements in their sales performance and role proficiency.

- Developed and implemented data-driven retention campaigns, successfully reducing customer churn while sustaining an industry-leading Net Promoter Score (NPS).
- Leveraged Power BI to interpret complex campaign and demographic data, translating findings into targeted goals that improved overall customer viability.

Customer Care Expert
T-Mobile | Bellingham, WA | Jun 2024 - Jun 2025

Formulated and executed service strategies that balanced customer needs with corporate standards in ethics, sales execution, and conflict resolution.

- Optimized customer satisfaction ratings by leveraging deep enterprise knowledge and aligning technical solutions with overarching business needs.
- Spearheaded a small team of new care agents, driving software proficiency and accelerating professional growth through targeted coaching and skills development.

PROJECTS

Ritual Records Systems Analysis

- **Conducted stakeholder interviews** with the business owner, frontline employees, and customers to capture requirements and architect a comprehensive systems overhaul.
- **Designed and normalized Entity-Relationship Diagrams (ERDs) to 3NF**, mapping out the entire enterprise infrastructure (POS, Inventory, and Payroll) to eliminate data redundancies and streamline system architecture.
- **Authored a comprehensive 10+ page systems proposal** and delivered a formal presentation to a review board, showcasing a deep command of the SDLC and systems analysis methodologies.
